Helping communities provide winter mobility since 1930.

In 1930, my Grandfather, Ed Gledhill, began The Gledhill Road Machinery Company because he saw the need for quality snow plow and road maintenance equipment. He also believed in American business being able to pioneer the best possible products in the world. Over the years, Gledhill has enjoyed steady growth through that philosophy. Today, four generations later, we will continue to offer you a superior product to maintain your roads and streets through a combination of commitment to quality, detail to construction, attention to design integrity, and second to none service.

Edward Gledhill

Gledhill manufactures a full line of snowplows to efficiently handle your snow removal needs!

SNOW PLOWS

Straight Moldboards

Gledhill makes snow plows of all types to help you in your job of plowing snow more efficiently! Straight moldboards have an integral "Built-In Baffle" and are available in uniform heights of 30", 36", 42", or 48", and in lengths of 9', 10', 11', or 12'. Various reversing combinations include four power reversing and one manual reversing models.

Taper Moldboards

Taper moldboard snow plows are designed for the higher speed method of plowing. Offered in cutting edge lengths of 10', 11' or 12' with three different intake and discharge heights. Moldboards have an integral "Built-In Baffle". May be selected as a fixed one way or as a manual reversible type.
